THE VERTICAL BIKE LOCKER

Our Space-Saving Vertical Bike Storage Solution

Need somewhere secure to leave bikes at home, in the garden, or in the office? The Vertical Bike Locker is the go-to choice. This locker is fully enclosed in steel, and stores bikes vertically freeing up valuable floor space in constrained areas. The guide rail at the bottom helps users push their bike in before clamping the front wheel over the retaining hook at the top. With a three-point locking system on the fully galvanised door, both bikes and belongings are safe inside once locked up and left. This locker is also ideal for commercial projects, where cyclists will appreciate the extra space to store their helmet, bag and other accessories. When installed in train stations or offices, it's a highly convenient bike storage solution, as cyclists can securely keep their bikes and anything else locked away.

- **Three-Point Locking System:** Pick and drill-resistant for maximum security
- **Vertical Space-Saving Design:** Stores bikes upright to reduce footprint
- **Guide Rail & Clamp:** Easy-to-use entry and secure front wheel retention
- **Weather-Resistant Construction:** Hot-dipped galvanised & polyester powder-coated mild steel
- **Accessory Storage:** Space for helmets, bags, and cycling gear
- **Made in Britain:** Designed, manufactured, and finished in the UK
- **Delivery:** Supplied fully assembled for quick installation
- **MOQ:** Minimum order of **2 units**
