

6-8 SPACE ORIGINAL CYCLE SHELTER INFORMATION SHEET

The original cycle shelter is our most popular and this storage solution is the smaller version, ideal when only limited storage is required. Accommodating six or eight bikes, it's a cost-effective and secure option for a range of applications. Our original shelter is a popular choice for all public buildings, schools, offices and housing developments.

As standard, the original cycle shelter includes either 3 or 4 hot-dipped galvanised hoop toastracks. Secure and convenient, cyclists will recognise the product and be able to lock their bikes up with ease.

Lead time: 3-4 weeks
