

20 SPACE CAMBRIDGE CYCLE SHELTER

SPACE SAVING TWO TIER STORAGE

The 20 Space Cambridge Two Tier Cycle Shelter is a smart choice for projects where space is at a premium, but secure bike storage is essential. Designed to accommodate up to 20 bikes within a compact footprint, this innovative shelter combines robust construction with sleek, modern aesthetics, making it ideal for commercial, public sector, and educational sites. Engineered for flexibility, the Cambridge Shelter features a modular design that can be expanded as your requirements grow, with options to enclose the shelter for enhanced security and weather protection fully. Pair it with our premium Two Tier Bike Racks to maximise storage density without sacrificing ease of use. Whether for new developments or retrofitting existing spaces, the Cambridge Two Tier Shelter helps you meet sustainability goals, achieve planning compliance, and promote active travel.

- › **Dimensions:** 3100mm (H) x 2100mm (D) x 4100mm (L)
- › **Two Tier Rack System:** Integrates seamlessly with our proven Two Tier Bike Racks, providing space-efficient storage for twice the number of bikes in the same footprint as a single-tier shelter
- › **Secure Bike Storage:** Allows users to lock the bike frame and wheels, top tier features a smooth-slide mechanism for safe and easy access.
- › **Customisable Options:** Available with powder coating in any RAL colour, choice of mesh infill: **10 Gauge Mesh as standard**, or upgrade to 358 Mesh or Twin Wire Mesh.
- › **Modular Design:** Expandable by 20 bike spaces simultaneously to meet growing demand, and optional rear panels and side extensions for additional weather protection.
- › **Fire Retardant Version Available:** Ideal for meeting building regulations in C1 & C2-rated spaces.

**Standard Minimum
Depth**

2100mm

FINISHING OPTIONS

10 Gauge Mesh

10 Gauge mesh is a durable and secure option for bike storage shelters, offering robust protection against theft and vandalism. Its strong, welded steel construction provides excellent visibility while maintaining high security. This mesh is a cost-effective, long-lasting solution designed to withstand the elements and provide peace of mind for end users.

358 Mesh

358 Mesh, also known as anti-climb mesh, is a high-security option for bike storage shelters designed to prevent tampering and unauthorised access. Its narrow apertures and robust steel construction make it extremely difficult to cut or climb, providing superior protection against theft and vandalism. Ideal for high-risk areas, the 358 Mesh offers excellent visibility while ensuring maximum bike security.

Twin Wire Mesh

Twin Wire Mesh is a durable and secure option for bike storage shelters, featuring dual horizontal wires for enhanced strength and rigidity. This robust design prevents vandalism while maintaining clear visibility, making it ideal for public spaces, schools, and workplaces. With its combination of security and aesthetic appeal, Twin Wire Mesh offers a long-lasting, cost-effective solution that protects bikes from theft.

PROJECT:

Old Swiss, Cambridge

Nestled along Cherry Hinton Road in Cambridge, the Old Swiss redevelopment blends historical charm and contemporary innovation. Development by CamProp, the former warehouses of Cambridge's Swiss Laundry have transformed remarkably into a cutting-edge 50,000 sq. ft. office and research and development campus space. Old Swiss provides a carefully designed setting with meeting areas and breakout zones, fostering an environment where productivity meets comfort. The strategic location, a 15-minute walk from Cambridge Station, a 25-minute bike ride to the Science Park, and a 30-minute car drive to Stanstead Airport, positions Old Swiss as a magnet for business.

Recognising the importance of secure bike storage, we partnered with CamProp to install state-of-the-art solutions, ensuring that cycling is not just a mode of transportation, but a lifestyle choice embraced by the entire community. The Bike Storage Company provided a 40 and 80-space version of the Cambridge Two-Tier Cycle Shelter, a cutting-edge solution designed for efficiency and durability. With a 10-year warranty, this shelter can accommodate many bicycles within a limited footprint. Made in Britain and meeting the highest standards, it seamlessly integrates with Old Swiss's commitment to providing a secure and convenient cycling infrastructure.
