

SECURED BY DESIGN IMPREGNABLE CYCLE SHELTER

Sold Secure Gold Certified and Police Preferred Specification Approved

The Secured by Design Impregnable Cycle Shelter is the specification-ready choice for projects where independently accredited cycle storage is a planning requirement or client brief. Built on a galvanised 80SHS mild steel framework and clad in FSC-certified sustainable timber, it combines the architectural appeal of the Amazon Eco range with Sold Secure Silver accreditation and Police Preferred Specification status under the official Secured by Design initiative. Independently tested against heavy manual and light electrical tool attack, it provides a clear, auditable compliance route for architects and specifiers working to SBD guidelines or local planning conditions. Internal 358 mesh to all sides and roof, Fourtress non-returnable security fixings, Gatemaster superhinges and a welded security box at the locking point deliver layered physical security across every configuration.

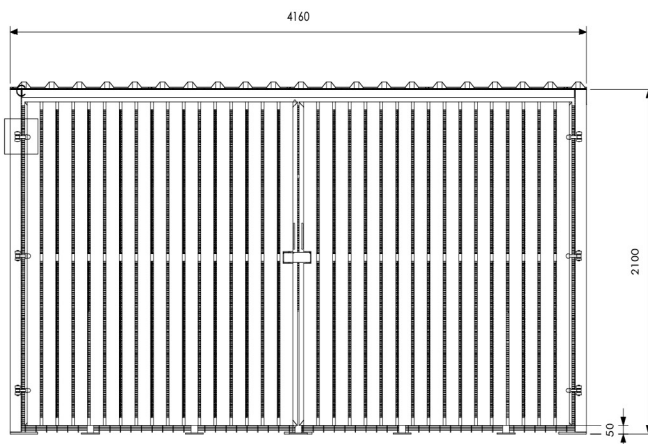

- › **Sold Secure Gold Accreditation:** Independently tested and certified against defined tool attack, providing documented evidence of attack resistance and a clear compliance route for SBD
- › **Internal 358 Mesh:** Fixed with 5mm clamp plates and Fourtress M8x50mm non-returnable security screws, eliminating exposed fixings and preventing panel removal
- › **Welded Security Box and Hasp Shroud:** Protects the locking point against attack, combined with 3No. Gatemaster superhinges per gate leaf for a fully hardened access point
- › **FSC-Certified Timber Cladding:** Sustainably sourced softwood or hardwood that blends seamlessly into landscaped, residential and commercial environments while supporting BREEAM Mat 03
- › **Made-in-Britain:** Backed by a 10-year warranty
