

20 Space Chelsea Two Tier Cycle Shelter - Information Sheet

20 Space Chelsea Two Tier Cycle Shelter

The 20 Space Chelsea Two Tier Cycle Shelter is designed to house our popular two-tier racks, which offer double the capacity of single-tiered storage, without compromising on security.

The user can lock both the frame and wheels of a bike to the rack. It's easy to reach and secure bikes on the top tier too. Simply slide it out and lower it down to allow easy access.

This shelter also boasts an anti-climb roof to prevent damage and vandalism.

The modular design can be expanded to increase the capacity on offer by 20 cycles at a time, making it an ideal choice where there's strong demand for secure bike storage.

Specification

The 20 Space Chelsea Two Tier Cycle Shelter offers high density storage with a contemporary design.

A visually pleasing shelter suitable across numerous environments including schools, offices, public spaces and housing developments.
