

Fixed Two Tier Bike Rack Information Sheet

Fixed Two Tier Bike Rack

Looking to provide as much bike storage as possible? The Fixed Two-Tier Bike Rack offers a cost-effective solution to increasing bike storage capacity through maximising space availability.

The two levels are fixed, so cyclists can place or lift their bikes into the channels to lock them up. The design includes a fitting locking hoop, which gives riders peace of mind by securing the frame and wheels.

The racks are spaced 375mm apart and double-stacked so that you can fit plenty of cycles within the area.

Specification

- Galvanised steel
- Powder-coating frame option
- 10-Year manufacturer's warranty
- Can contribute to BREEAM accreditation
- Designed and manufactured in Britain
- Manual lifting required, contact us directly to discuss suitability for your project.
