

Toastrack Information Sheet

Toastrack

If you're looking for a flexible bike storage solution, the modular design of the Toastrack will be able to deliver.

Ideally bolted onto concrete, it allows the frame and wheels to be locked securely to the rack.

It's ideal for areas which experience high volumes of traffic, where you need to accommodate for numerous cyclists.

The benefits of installing secure, aesthetically pleasing bike storage solutions are multifaceted. Including BREEM compliance for your project, improved satisfaction for the end user and contribution to an enjoyable, well-organised space.
