

THE E-BIKE LOCKER

Three-Point Locking and Tamper-Resistant Construction

The E-Bike Locker is a premium storage solution designed to meet the growing demand for secure, future-proof facilities for electric bicycles. Purpose-built for residential developments, housing schemes and commercial projects, this locker combines security, weather protection, and integrated charging in one streamlined unit. Each locker accommodates up to two e-bikes, protected within a fully enclosed, weatherproof steel frame. A dual internal charging point ensures bikes remain charged and ready to use, while a three-point locking system delivers peace of mind against theft or tampering. Customisation is at the core of this locker, with optional upgrades such as powder-coated RAL finishes help align this product with project design schemes, while BREEAM compliance helps further support sustainability objectives. The modular design also allows lockers to be installed as standalone units or combined.

- › **Internal Weatherproof Dual Electric Charging Point:** Convenient, reliable charging for two e-bikes
- › **Optional Powder-Coated Finish:** Increased durability and customisation to suit your scheme
- › **BREEAM Compliance:** Supports sustainable building practices
- › **Weather Protection:** Supports sustainable building practices
- › **Spacious Design:** Stores up to two electric bikes with ample manoeuvring space.
- › **Modular Design:** These lockers can be installed as standalone or combined to provide increased storage for large scale developments
- › **Three-Point Locking Door:** Enhanced security providing peace of mind for end users
- › **Proudly Made in Britain:** High-quality construction and long-lasting performance
- › **Minimum Order Quantity:** Two

THE E-BIKE LOCKER

The E-Bike Locker provides secure, weatherproof storage for up to two electric bikes, complete with an internal dual charging point. Built from heavy-duty steel with a three-point locking system and customisable finishes, it's fully BREEAM compliant and designed for modular use across any project.
