

Eastbrook Cycle Shelter Information Sheet

Eastbrook Cycle Shelter

Our Eastbrook Cycle Shelter was developed for a longstanding client of ours, with requirements for high security combined with aesthetic appeal. This shelter is fabricated from an 80mm box section frame with a combination of 358 high-security mesh and FSC hardwood panelling and the option for internal mesh where increased security is required.

Internally IP65 rated LED lighting with PIR activation and a swipe card access control unit provides security to the single swing gate. Offered with our Two Tier Cycle Rack as standard, this shelter is also suitable for our Semi Vertical Bike Racks or Toastracks to provide lower head heights.

Specification

Our Eastbrook Cycle Shelter delivers high security coupled with a memorable aesthetic.

A highly popular bike shelter option that provides both security and a visually pleasing addition to your property.
