

Amazon Eco Bin Store Information Sheet

Amazon Eco Bin Store

The Amazon Eco Bin Store is a visually pleasing timber clad bin store that is perfect for any residential or commercial property.

Using FSC-certified timber, this is a great option for creating a sustainable yet durable bin store for your site.

Removes unsightly waste from view and reduces odours with its vented design.

The store can be installed with either an open or closed roof, or with our sedum roofing system.

We also offer various locking options to suit your requirements.

Create a clearly identifiable and easily accessible refuse area that reduces the risk of littering and encourages recycling.
