

Premium Solo Vertical Bike Rack Information Sheet

Premium Solo Vertical Bike Rack

High-quality, modern cycle storage.

Our Premium Solo Vertical Bike Rack has been designed to be the ultimate in space-saving, vertical cycle storage.

Engineered to permit both single-sided and integrated back-to-back configurations, it has proven to be the go-to for premium office and high-end residential environments. The individual 'Solo' upright post design allows for usability where a suitable wall is unavailable.

These units have become commonplace in most-high-specification end of journey projects. They are available in a range of RAL colours and gloss levels that allow for a contrasting of the wheel bracket and support post.
