

Premium Security Enclosure Information Sheet

Premium Security Enclosure

Provide your site visitors with the peace of mind that comes from high security bike storage.

Our Premium Security Enclosure is a high-end option for anyone looking to provide a safe location for cyclists to secure their bikes. A bespoke product, this enclosure can be made to any size.

Optional security systems include electronic access control, mechanical digital lock, lock and key, and hasp and staple for the single leaf galvanized mesh swing gate.

With a holistic range of security measures available, this shelter will leave your site's cyclists safe in the knowledge that their bike is secure on your premises.

Featured installation: utilises galvanised toastrack parking with space for 52 cycles, as well as front and partial side elevations clad in 656 security mesh for a high security storage solution.
