

SEMI VERTICAL E-BIKE RACK

Future-Proof, Space-Saving Bike Storage with Integrated Charging

As the adoption of e-bikes continues to grow, our Semi-Vertical E-Bike Rack provides a forward-thinking solution that combines compact storage with integrated charging. Built to meet the evolving demands of modern transport infrastructure, this rack enables you to accommodate e-bike users securely and efficiently, without compromising on space. The rack's semi-vertical design makes it an ideal choice for areas where space is at a premium. Its modular format allows for indefinite extension, making it equally suited to small courtyards, residential developments, or large-scale commercial car parks. With staggered rack heights, each space is easily accessible, even when bikes are parked side by side. Each unit is fitted with twin-gang 13A 240V plug sockets, fixed at a convenient and reachable height, allowing cyclists to charge their e-bikes while securely locking them.

- › **Integrated E-Bike Charging:** Each rack includes twin-gang 13A 240V plug sockets for user charging.
- › **Space-Saving Vertical Storage:** Ideal for sites with limited floor space and high user demand.
- › **Expendable Modular Design:** Racks can be added indefinitely to suit larger layouts and future capacity.
- › **Secure Locking System:** Steel locking hoops allow both the frame and wheels to be locked safely.
- › **Custom Powder Coating:** Optional finishes in any RAL colour to match your site's branding.
- › **Staggered Rack Heights:** Enhances accessibility and ease-of-use in multi-bike installations.
- › **Optimised for Durability:** Galvanised finish with optional polyester powdered coating.
- › **Flexible Installation Layouts:** Supports back-to-back and X-style configurations.

**Clear Access Space in
Front of Racks**

PROJECT

Banks Yard

Bankside Yards is an extensive new-build development that delivered eight luxurious mixed-use buildings to the South Bank of London. Fifty storeys high, the project has provided commercial, residential, and retail space with stunning views across the city; the site will also house a five-star resort hotel. Bankside Yards' central location and dedicated well-being area make it ideal for offering cycling opportunities, and it was our privilege to build a bespoke bike storage zone to facilitate this. Following a complimentary site survey, we worked towards the developer's specifications to design, manufacture and install a customised internal bike storage area for the project.

To help the client achieve BREEAM status for their site, our team delivered 350 Semi Vertical Cycle Rack spaces, a product specifically selected to give high-density bike storage within the limited space available. The client's focus on future-proofing the facilities also saw us install options from our e-racking range, with 100 Semi Vertical E-Bike Racks and 10-E Scooter Racks provided. The Semi Vertical E-Bike Racks came with twin-gang 13A 240V plug sockets fixed to a convenient access point so users can securely park and immediately start charging.
