

Semi Vertical E-Bike Racks Information Sheet

Semi Vertical E-Bike Racks

As the e-bike's popularity continues to gather momentum, our Semi Vertical E-Bike Racks ensure you're best placed to futureproof the needs of cyclists at your destination.

Designed for areas where space is at a premium, the Semi Vertical E-Bike Rack can be extended indefinitely, meaning it can be tailored to any space.

The rack comes with high-security locking hoops as standard and an integrated 240V charging socket, e-bike riders can safely park up and charge their bikes in preparation for their next journey.
