

Amazon Eco 2 Cycle Locker Information Sheet

Amazon Eco 2 Cycle Locker

The Amazon Eco 2 Cycle Locker is a sturdy structure, with 3mm solid steel roofing, double lockable swing gates and fully clad in clear sealed pine. It's designed to fit two standard-sized cycles, ideal for all domestic locations.

Whether you're working on a large housing project or are looking for a cycle store for your home, it's a great solution. Instead of stepping outside and seeing overflowing cycles, you can store them away securely.

The swing gates open wide enough, so there's plenty of room to manoeuvre two cycles in and out. You can also choose a powdercoated finish in a range of RAL colours to personalise your bin store.

Specification

This locker is available with two timber options, either standard 100mm x 20mm timber battens or upgraded to our premium 50mm x 25mm at an additional cost.
