

## Bike Stair Ramp Information Sheet

### Bike Stair Ramp

The Bike Stair Ramp is a simple but effective method of enabling cyclists to wheel their bikes up and down stairs rather than having to carry them.

It is fabricated from mild steel and hot dip galvanised to provide a strong and durable product that's built to last. The Bike Stair Ramp can be made to suit any length staircase and we can also provide powder coating as a finishing option.

The cycle channel features a non-slip grip for use in any weather conditions and is suitable for internal or external use.

This can be a valuable aid for reducing the risk of strain or injury when carrying bikes up and down flights of stairs, providing a valuable health and safety feature.

### Specification

- Durable steel structure, designed for external use
- Galvanised finish to BS EN ISO 1461 : 2022 as standard
- Powder coating options available as extra
- Reduces injury risks
- Extendable length
- Takes up a limited footprint
- Made in Britain
- 10-year manufacturer's warranty
- Contact us for a free quotation
