

Premium Chelsea Two Tier Cycle Shelter Information Sheet

Premium Chelsea Two Tier Cycle Shelter

Our Premium Chelsea Two-Tier Shelter is born from one of our most popular products, featuring fully fabricated and uprated 76.2mm CHS supports and a host of other features.

The standard finish for the framework of the premium Chelsea is hot-dip galvanised and polyester powder coated. Making it truly customisable. The roof is fitted with clear polycarbonate as standard.

Additional upgrades to our premium Chelsea include; guttering, solar lighting, PIR lighting & coloured multi-wall glazing. This shelter is designed to house 20 cycle spaces, achievable via either our fixed, standard or gas-assisted Two-Tier Racks. However, as with every shelter within our range, the Premium Chelsea Two-Tier Shelter can be constructed to suit any number of cycles.
