

## Solo Vertical Bike Rack Information Sheet

### Solo Vertical Bike Rack

The Solo Vertical Bike Rack is a great addition to our range, providing a flexible, freestanding alternative to larger fixed or wall mounted racks. This product is designed to maximize use of space and reduce the footprint consumed by larger racks in tighter spaces.

These cycle racks can be used independently or can be combined with other cycle storage solutions to maximise the use of space in any environment.

With the Solo Vertical Bike Rack, the bicycle can be secured by both the frame and the wheels, allowing for BREEAM compliance while ensuring the bike remains secure in place.

### Specification
