

Vertical Bike Hanger Shelter Information Sheet

Vertical Bike Hanger Shelter

Our Vertical Bike Hanger Shelter, is a robust yet affordable solution providing effective sheltered cycle storage in outdoor areas. Manufactured from prefabricated SHS, this shelter can be transported and installed with ease. It's modular design consists of fastened horizontal sections, fully welded end sections and adjustable base plates, making it incredibly versatile and adaptable.

This shelter is hot dip galvanised as standard, but can be polyester powder coated in a range of RAL colours on request. The shelter also includes a profiled sheet metal roof, which can be fitted with a fascia and guttering if required. As an alternative to steel, the roof and flashing can also be manufactured from Platisol.
