

WINDSOR CYCLE SHELTER

Customisable Shelter Fit for Any Project

The Windsor Cycle Shelter combines architectural elegance with robust functionality, making it an ideal choice for premium residential and commercial developments. Designed to deliver secure, weather-protected cycle parking while complementing contemporary architecture, the Windsor features a refined timber aesthetic paired with a durable steel structure. Manufactured in Britain and fully customisable, the Windsor can be tailored to suit specific site requirements, including bespoke dimensions, timber finishes and integrated features. Its clean-lined canopy provides generous weather protection and open, unobstructed access for users. The Windsor Cycle Shelter is compatible with both single-tier racks and high-capacity two-tier systems, ensuring flexibility across projects where space efficiency is critical.

- › **Fully Customisable Design:** Available in bespoke lengths, widths and heights to suit site constraints. Compatible with both single and Two Tier cycle racks.
- › **Timber-Clad Steel Framework:** Structural 80mm SHS steel vertical posts provide strength and durability, finished with high-quality timber cladding to deliver an architectural aesthetic.
- › **High-Capacity Storage Options:** Suitable for single-tier or two-tier rack configurations to maximise cycle capacity per square metre.
- › **Robust Steel Framework:** Galvanised steel components ensure long-term structural integrity and durability.
- › **BREEAM Compliant:** Supports sustainable building initiatives
- › **10-Year Manufacturer's Warranty:** Ensuring durability and peace of mind

WINDSOR CYCLE SHELTER

The Windsor Cycle Shelter is a bespoke, British-manufactured cycle canopy designed to provide secure and visually refined bike storage. Featuring structural timber elements combined with galvanised steel supports, it offers a contemporary, design-led solution suitable for a wide range of environments.

Compatible with single-height and two-tier rack systems, Windsor maximises capacity while maintaining accessibility and visual appeal. Optional upgrades include integrated lighting, bespoke RAL steel finishes, and access control enhancements.

Customisation that Works for You

Every site is different which is why this shelter is built to adapt:

- › Mild steel framework, hot dip galvanised to BS EN ISO 1461:2022
- › Powder-coated steel elements available in any RAL colour
- › Structural timber posts and beams (finish and species subject to specification)
- › Modular and extendable configuration
- › Compatible with single and Two Tier cycle racks
- › Optional IP65-rated LED lighting with PIR activation
- › Optional grated mesh partitions
